

More customers. Less on your plate.

We build and run your marketing, from the first post to the booked appointment.

Strategy, content, ads, and AI-powered follow-up.
One team to connect the work and keep it moving.

Clone yourself. Start with your marketing.

You know your business. We help you put that knowledge to work.

We learn your voice, shape the plan, and handle the work in your package. Our team builds AI workflows for recurring tasks and checks their performance.

You keep control. Your team handles sales and serves your customers.

- + AI workflows and performance reviews

We connect the work.

01

Find the gaps.

We review your offer and the steps people take before buying. Together, we choose what to fix first.

02

Build the process.

We create the agreed campaigns, pages, and follow-up. You know who owns each task.

03

Keep improving.

We review inquiry quality, bookings, and sales feedback, then adjust the work.

AI that fits the job.

We configure and check workflows for drafting, lead routing, reminders, reporting, and follow-up.

Maia Pro

An assistant configured around your business context for research, reports, and agreed internal workflows.

Maia Leads

Calling and messaging support for lead qualification, follow-up, and appointment booking.

We recommend the tools that fit your needs. Your proposal confirms access, usage allowances, and any additional fees for Maia Pro or Maia Leads.

A clear scope from the start.

Software + ad spend

Your package includes agreed software allowances. You pay advertising spend separately.

Your part

You provide access, approvals, and business information. Your team handles sales calls and customer fulfillment.

We agree on formats, revisions, channels, and support. Results depend on your offer, budget, market, and sales follow-through. We do not guarantee a fixed number of customers.

Content + production

A core post is one piece adapted for agreed channels. Full MaiaOS includes one shoot day in an agreed service area.

Setup + travel

We scope the initial build before starting. For remote shoots, we can arrange a local partner and quote extra travel.
